

ECO 210

TAPE MADE FROM RECYCLED PET BOTTLES

TECHNICAL DATA SHEET

DESCRIPTION

Eco 210 is a BOPET film made from at least 85% recycled plastic waste sourced from PET bottles. It is a thin but very strong tape with high adhesive strength. The tape has a synthetic rubber (hotmelt) adhesive layer.

The Eco 210 is suitable for light, medium, and heavy packages. The tape can be processed by hand, tape dispenser, or automated application.

FEATURES

- Strong tape despite thinner film
- Excellent adhesion on all surfaces
- High adhesive strength
- Recyclable
- Very efficient to use due to more meters on a roll (132 meters)

SPECIFICATIONS

Material

BOPET made from at least 85% recycled material

Adhesive

Hotmelt

Ink

Eco-Solvent

Film thickness

19 microns

Total thickness

36 microns

Adhesion to steel

5,0 N/cm±0,6

Core diameter

±76 mm

Core material

100% recycled cardboard

Available colors

White
Brown
Transparent

Tape width

25, 38, 50, 75, 100, 150 mm

Tape length

66, 99, 132, 330 m

STORAGE ADVICE

Shelf Life
6-9 months

Storage temperature
15 °C - 23 °C

Sunlight/UV
Protect against direct sunlight and store in the original packaging.
