

ECOPAPER 110

65% BIOBASED PAPER TAPE

TECHNICAL DATA SHEET

DESCRIPTION

EcoPaper 110 is a self-adhesive paper tape that consists of a silicone and plastic-free paper backing (60g/m²) made from (ECF) chlorine-free bleached pulp. The tape is equipped with a natural rubber adhesive primarily made from renewable raw materials. This paper tape offers a reliable, sustainable, and plastic-free tape alternative and is highly suitable for light and medium-weight packages. The tape can be applied by hand, tape dispenser, or automated application. This tape has a bio-based content of approximately 65%. Available in brown and white.

FEATURES

- Paper made from unbleached chlorine-free (ECF) natural pulp sourced from sustainable European forestry.
- Paper backing is free from silicone and plastic.
- Excellent adhesion on all surfaces.
- Easy and low-noise unwinding.
- Tearable by hand.
- Recyclable.

PRINTING

The printing possibilities for EcoPaper 110 are limited. Small details/ screen angles can clog or disappear. Full-color and solid positive print are not possible. There are a limited number of printing colors available and colors may vary slightly. Printing in light colors such as white and yellow may be difficult to read/see, at your own risk.

STORAGE ADVICE

Shelf Life
6-9 months

Storage temperature
15 °C - 23 °C

Sunlight/UV
Protect against direct sunlight and store in the original packaging.

SPECIFICATIONS

Material
Paper

Adhesive
Natural rubber

Ink
Eco-Solvent

Paper thickness
90 microns

Paper weight
60 g/m²

Total thickness
125 microns

Adhesion on steel
2,5 N/cm±0,6

Core diameter
±76 mm

Core material
100% recycled
cardboard

Available colors
Brown
White

Tape width
25, 38, 50, 75, 100, 150 mm

Tape length
